The ultimate love story continues in *Love Never Dies*, Andrew Lloyd Webber's spellbinding sequel to *The Phantom of the Opera*.

Now one of the world's finest sopranos, Christine accepts an invitation to travel from Paris to New York to perform at a renowned opera house. Christine's marriage to Raoul is suffering at the hands of his drinking and gambling and they desperately need the financial rewards that America can give them. Presented in English and French (with Spanish audio available) *Ultimate Dinosaurs* requires a surcharge for members and non-members. 3D FILMS IN THE HOGLUND FOUNDATION THEATER, A NATIONAL GEOGRAPHIC EXPERIENCE

Fly high, dream big and blast off to space! Pop on some 3D glasses, and get ready for a wild ride. Films are presented locally by Primrose Schools. Visit <http://perotmuseum.org> for show times and tickets.

The current line-up of films (through September 3) is as follows:

• Flying Monsters 3D

Just as dinosaurs began their domination of Earth, pterosaurs ruled the prehistoric skies. With wingspans as wide as a modern jet plane, these flying reptiles were as spectacular in appearance as they were amazing in flight. Join world-renowned naturalist and documentary filmmaker David Attenborough as he recounts the fascinating story of how humans first discovered these creatures and how pterosaurs were able to get off the ground and soar... until their sudden disappearance from Earth.

• Galapagos 3D

In the vastness of the Pacific Ocean, there is a paradise unlike any other: the Galapagos. Amongst these remote volcanic islands, life has played out over millions of years in relative isolation. The

result is a wonderland of nature, with a remarkable collection of plants and charismatic animals that have all adapted to this unique environment.

• Museum Alive

As the doors are locked and night falls, David Attenborough meets the extinct creatures that fascinate him the most, as they magically come alive in front of his eyes – dinosaurs, ice age beasts, and giant reptiles. This is a special collaboration of experts and curators from the Natural History Museum with 3D and ground-breaking CGI technology. Set within the spectacular Natural History Museum, David is able to analyze each specimen, piecing together the clues before finally revealing each creature as it has never been seen before.
